

Specialist Assessment Report

Child Name: Sara Mohammed

Age: 8 years

Assessment Date: August 4, 2026

Center: Barka Early Intervention Center

Reason for Referral:

Hyperactivity, impulsive behavior, short attention span, difficulty completing classroom tasks.

Clinical Observations:

Sara frequently leaves her seat, interrupts conversations, struggles to remain focused, and requires frequent reminders.

Strengths:

Creative thinking, excellent verbal communication, enthusiastic participation.

Recommendations:

Behavioral therapy, classroom accommodations, executive functioning exercises, parent behavior strategies.

Progress Since Previous Assessment:

Improved classroom participation and reduced impulsive behavior. Attention difficulties remain.

Clinical Impression:

Findings are consistent with Attention Deficit Hyperactivity Disorder (ADHD).
